Family Medical History

Health problems sometimes run in the family. That's why it's important to know as much as you can about the health of your birth family. This information can help your doctor provide better care.

Start with what you know, then ask your parents or other relatives for more information. It's a good idea to update this chart every year or so. Take a copy with you every time you see a new doctor so that he or she can keep it in your chart.

Acknowledgement of receipt of privacy practice

Patient Name: _____ Date of birth: _____

During providing service to you, we create, receive and store health information that identifies you. It is often necessary to use and disclose this health information to treat you, to obtain payment for our services and to conduct health care operations involving our office.

The **Notice of Privacy Practices** you have been given describes these uses and disclosures in detail. You are free to refer to this notice at any time before you sign this form. As described in our **Notice of Privacy Practices**, the use and disclosure of your health information for treatment purposes not only includes care and service provided here, but also disclosures of your health information as may be necessary or appropriate for you to receive follow-up care from another health professional.

Similarly, the use and disclosure of your health information for purposes of payment includes (1) our submission of your health information to a billing agent or vendor for processing claims or obtaining payment; (2) our submission of claims to third-party payers or insurers for claims review, determination of benefits and payment; (3) our submission of your health information to auditors hired by third-party payers and insurers; and (4) other aspects of payment described in our **Notice of Privacy Practices**. Our **Notice of Privacy Practices** will be updated whenever our privacy practices change. You can get an updated copy here at the office.

When you sign this consent document, you signify that you agree that we can and will use and disclose your health information to treat you, to obtain payment for our services and to perform healthcare operations. You also signify that you have received a copy of our **Notice of Privacy Practices**.

You have the right to ask us to restrict the uses or disclosures made for purposes of treatment, payment, or healthcare operations, but as described in our **Notice of Privacy Practices**, we are not obliged to agree to these suggested restrictions. If we do agree, however, the restrictions are binding on us. Our **Notice of Privacy Practices** describes how to ask for a restriction.

I have read this document and understand it. I consent to the use and disclosure of my health information for purposes of treatment, payment, and healthcare operations. I acknowledge that I have received the Notice of Privacy Practices from WMC. I also understand that by refusing to sign this consent or revoking this consent, this organization may refuse to treat me as permitted by Section 164.506 of the Code of federal Regulations.

Controlled Substances Agreement

PLEASE BE ADVISED, WE WILL NO LONGER BE PROVIDING CHRONIC NARCOTIC PAIN MANAGEMENT SERVICES. INFORM US IF THIS IS THE PURPOSE OF YOUR VISIT SO WE MAY REFER YOU TO THE APPROPRIATE PAIN MANAGEMENT SPECIALIST.

The purpose of this agreement is to protect your access to controlled substances and to protect our ability to prescribe for you. The long-term/ short term use of such substances as opioids (narcotic analgesics), benzodiazepine, tranquilizers, and barbiturate sedatives are controversial because of uncertainty regarding the extent to which they provide long-term benefit.

There is also the risk of an addictive disorder developing or of relapse occurring in a person with a prior addiction. Because these drugs have potential for abuse or diversion, strict accountability is necessary when use is prolonged.

For this reason, the following policies are agreed to by you, the patient, as consideration for, and a condition of, the willingness of the physician to consider the initial and/or continued prescription of controlled substances to treat your chronic pain.

1. All controlled substances must come from the physician whose signature appears below or, during his or her absence, by the covering physician, unless specific authorization is obtained for an exception. (Multiple sources can lead to untoward drug interactions or poor coordination of treatment.)
2. You are expected to inform our office of any new medications or medical conditions, and of any adverse effects you experience from any of the medications that you take.
3. The prescribing physician has permission to discuss all diagnostic and treatment details with dispensing pharmacists or other professionals who provide your health care for purposes of maintaining accountability.
4. You may not share, sell, or otherwise permit others to have access to these medications.
5. Unannounced, random urine or serum toxicology screens may be requested, this will be at the patient's expense and your cooperation is required. Presence of unauthorized substances may be subject to discontinuation of medication and/or termination from care effective immediately.
6. Prescriptions and bottles of these medications may be sought by other individuals with chemical dependency and should be closely safeguarded. It is expected that you will take the highest possible degree of care with your medication and prescription. They should not be left where others might see or otherwise have access to them.
7. Since the drugs may be hazardous or lethal to a person who is not tolerant to their effects, especially a child, you must keep them out of reach of such people.
8. Medications may not be replaced if they are lost, get wet, are destroyed, left on an airplane, etc. If your medication has been stolen and you complete a police report regarding the theft, an exception may be made.
9. Early refills will generally not be given.
10. If the responsible legal authorities have questions concerning your treatment, as might occur, for example, if you were obtaining medications at several pharmacies, all confidentiality is waived, and these authorities may be given full access to our records of controlled substances administration.
11. It is understood that failure to adhere to these policies may result in cessation of therapy with controlled substance prescribing by this physician or referral for further specialty assessment.
12. Renewals are contingent on keeping scheduled appointments. Please do not phone for prescriptions after hours or on weekends.
13. The risks and potential benefits of these therapies are explained elsewhere [and you acknowledge that you have received such explanation].

You affirm that you have full right and power to sign and be bound by this agreement, and that you have read, understand, and accept all its terms.

Consent for Suboxone / Subutex Therapy

Suboxone is used to treat opiate addiction.

Subutex is a prescription medication that's used to treat narcotic addictions and dependence.

This decision was made because my condition is serious or other treatments have not helped my pain. I am aware that the use of such medicine has certain risks associated with it, including, but not limited to: sleepiness or drowsiness, constipation, nausea, itching, vomiting, dizziness, allergic reaction, slowing of breathing rate, slowing of reflexes or reaction time, physical dependence, tolerance to analgesia, addiction, and possibility that the medicine will not provide complete pain relief.

I am aware about the possible risks and benefits of other types of treatments that do not involve the use of opioids. I will tell my doctor about all other medicines and treatments that I am receiving. **DURING MY TREATMENT WITH DR. WOLFSON I WILL NOT OBTAIN TREATMENT FROM ANOTHER PHYSICIAN FOR OPIOID DEPENDENCE.**

I will not be involved in any activity that may be dangerous to me or someone else if I feel drowsy or am not thinking clearly. I am aware that even if I do not notice it, my reflexes and reaction time might still be slowed. Such activities include but are not limited to: using heavy equipment or a motor vehicle, working in unprotected heights or being responsible for another individual who is unable to care for him or herself.

I am aware that certain other medicines such as nalbuphine (Nubain™), pentazocine (Talwin™), buprenorphine (Buprenex™), and butorphanol (Stadol™), may reverse the action of the medicine I am using for pain control. Taking any of these other medicines while I am taking my pain medicines can cause symptoms like a bad flu, called a withdrawal syndrome. I agree not to take any of these medicines and to tell any other doctors that I am taking an opioid as my pain medicine and cannot take any of the medicines listed above.

I am aware that addiction is defined as the use of a medicine even if it causes harm, having cravings for a drug, feeling the need to use a drug and a decreased quality of life. I am aware that the chance of becoming addicted to my pain medicine is very low. I am aware that the development of addiction has been reported rarely in medical journals and is much more common in a person who has a family or personal history of addiction. I agree to tell my doctor my complete and honest personal drug history and that of my family to the best of my knowledge.

I understand that physical dependence is a normal, expected result of using these medicines for a long time. I understand that physical dependence is different from addiction. I am aware physical dependence means that if my pain medicine use is markedly decreased, stopped, or reversed by some of the agents mentioned above, I will experience a withdrawal syndrome. This means I may have any or all the following: runny nose, yawning, large pupils, goose bumps, abdominal pain and cramping, diarrhea, irritability, aches throughout my body and a flu-like feeling. I am aware that opioid withdrawal is uncomfortable but not life threatening.

I am aware that tolerance to analgesia means that I may require more medicine to get the same amount of pain relief. I am aware that tolerance to analgesia does not seem to be a big problem for most patients with chronic pain; however, it has been seen and may occur to me. If it occurs, increasing doses may not always help and may cause unacceptable side effects. Tolerance or failure to respond well to opioids may cause my doctor to choose another form of treatment.

(Males only) I am aware that chronic opioid use has been associated with low testosterone levels in males. This may affect my mood, stamina, sexual desire, and physical and sexual performance. I understand that my doctor may check my blood to see if my testosterone level is normal.

(Females Only) If I plan to become pregnant or believe that I have become pregnant while taking this pain medicine, I will immediately call my obstetric doctor and this office to inform them. I am aware that, should I carry a baby to delivery while taking these medicines; the baby will be physically dependent upon opioids. I am aware that the use of opioids is not generally associated with a risk of birth defects. However, birth defects can occur whether the mother is on medicines and there is always the possibility that my child will have a birth defect while I am taking an opioid.

I understand I am expected to follow up with Dr. Wolfson until treatment is complete. Monthly office contact must be made either in person or over the phone to justify continuation in treatment.

If I do not follow up within 30 days after my last office visit it will be assumed, I have successfully completed the treatment. Wolfson medical center will not accept a returning Suboxone patient if he/she does not follow up within the 30-day period allowed. I am aware I will be randomly drug tested at patient's expense. NO EXCEPTIONS!!

I have read this form, or have it read to me. I understand all of it. I have had a chance to have all my questions regarding this treatment answered to my satisfaction. By signing this form voluntarily, I give my consent for the treatment of my pain with opioid pain medicines.

Advanced Directives

Adults 18 years and older have the right to make decisions regarding their own health care. They may accept or refuse care based on their own desires. The best time to determine what will be regarding the choice of health care is before admitted to a health care facility. In the event a person loses the ability to make these decisions, there are two legal documents that protect their right to refuse unwanted medical treatment, or to request treatment that is wanted. These documents are called Advanced Directives.

There are two forms of Advanced Directives that are acknowledged in Nevada.

1. Declaration (Living Will) NRS 449.535-449.720

The Declaration (Living Will) is in effect only when the attending physician determines the patient's condition is terminal and there is no chance for recovery. The Declaration (Living Will) allows a person to state his or her own medical decisions.

2. Durable Power of Attorney NRS 449.800-449.860

The Durable Power of Attorney for Health Care allows a person to name someone else to make the decisions about their medical care, including decisions about life support, if they can no longer speak for themselves. This appointed person may make decisions regarding health care if a condition renders the patient unable to speak; it does not require the condition to be terminal.

In the case that a person has not prepared an Advanced Directive, the closest living relative would be asked to give consents and make decisions for the health care given.

For more information regarding Advanced Directives or to ask questions, you may contact the following resources:

Department of Human Resources
Health Divisions
Bureau of Licensure and Certification
4220 South Maryland Parkway, #810
Las Vegas, NV 89119 702 486-6515

Choice in Dying
1620 Eye Street N.W., #202
Washington D.C 20006
1 800-989-9455

Because the Durable Power of Attorney for HealthCare Decisions is legal document, you may want to contact the following for a referral to an attorney.

State Bar of Nevada
600 East Charleston Blvd.
Las Vegas, NV 89104 702 382-2200

State Bar of Nevada
1325 Airmotive Way, #140
Reno, NV 89502 775 329-4104

***Providers of service are required to inform their patients of their right to formulate an Advanced Directive, prior rendering medical treatment that requires a consent form and to document in the enrollee's medical record whether an Advanced Directive has been executed.

I have an Advanced Directive ☐ Yes *IF YES, please provide copy to office.* ☐ No
